

Tivoli Audio™ Albergo™ shown in Graphite and White

ALBERGO AM/FM Clock Radio

Tivoli Audio's Albergo AM/FM table radio was designed so that anyone can use it without confusion or frustration. The front panel controls are minimal and straightforward and the display will prompt you with instructional "hints" while using certain features, such as the alarm setting. In moments you can tune the radio, set the dual alarms, and activate the sleep timer without reaching for the manual. Accessing the *Bluetooth* wireless technology is equally simple; after the push of a single button, you can pair your smart phone, tablet, or other *Bluetooth* enabled-device, and begin wirelessly streaming your favorite music to Albergo. All of these features are available with the included fully functional remote, though it is not necessary for you to use the Albergo.

We use the same 3" full range, long-throw driver found in our highly acclaimed Model One table radio. This allows top-notch sound quality from a cabinet that occupies remarkably little space, unlike many of the clock radios found on the market today.

Albergo is the perfect finishing touch to any hotel or guest room. When blending into existing furnishings and ease-of-use are at the top of your requirements list, Albergo satisfies them and more.

Although our color options will blend with most room décor, optional cabinets are available in a variety of luxury finishes to allow personalization of your Albergo. And if its a compact stereo sound system you are after, the Albergo has a matching stereo speaker available in select finishes.

- Stream music wirelessly through Albergo
- Uses *Bluetooth* wireless technology's advanced A2DP profile for high-quality sound
- Frequency Hopping Spread Spectrum (FHSS) results in low-to-no noise interference with other wireless devices
