

ADVANCED INFORMATION AE100²

ACOUSTIC ENERGY
for the love of music

The AE100² is a compact standmount / bookshelf loudspeaker that exhibits qualities which perfectly embody those of Acoustic Energy.

The AE100² has been designed with a view to achieving high sound pressure levels from a small enclosure. This is obtained principally through the use of a 130mm mid-bass drive unit built around an ultra-high force, long throw motor system. Bass performance is augmented by a slot shaped duct allowing for a considerable cross-sectional area while negating the issues of air turbulence.

A 25mm soft dome tweeter featuring our Wide Dispersion Technology completes the driver compliment and is housed within a 15mm HDF cabinet. Taking design cues from the award-winning 500 Series and finished in a choice of satin white, black or walnut vinyl veneer finishes. The AE100² is sure to look good placed on speaker stands or bookshelves, while delivering a sound that belies its compact size.

AE100² Specifications

- Drive Unit: 130mm paper cone
- Tweeter: 25mm fabric dome
- Frequency Range: 51Hz - 26kHz
- Sensitivity: 87dB
- Peak SPL: 112dB
- Power Handling: 120w
- Crossover Frequency: 2.9kHz
- Impedance: 6ohms
- Design: 2-way
- Grilles: Slim, cloth magnetic fit
- Dimensions: 290 x 165 x 250 (HxWxD)
- Weight: 9.2kg (pair)
- Finishes: Satin Black, Satin White and Walnut vinyl veneer
