

# JAMO 360 SERIES • C 35

## Design

Drawing inspiration from nature, the Jamo 360 Series boasts organic curvaceous shapes that produce immersive and vivid sound in all directions, creating both a visual and acoustic statement in your home or commercial space.

The C 35 center channel speaker sports an elegantly sloped design with a beautiful high-gloss shell that houses a pair of aluminum-polypropylene woofers and aluminum dome tweeter which create stunning vocal clarity, ensuring you never miss a whisper.

A polished aluminum post connects the C 35's shell to a brushed aluminum alloy base that keeps this specimen of Danish design firmly rooted to a flat surface.

Thoughtfully crafted, the center channel speaker can be easily mounted on a wall, granting you the ultimate in flexibility and producing a wide and lifelike soundstage. Installing the speaker is quite simple, as the C 35 has a spring-clip connector in the back.

The C 35's distinctive Danish design makes these speakers a show-stopping conversation piece at your next dinner party and represents a true statement on modern acoustic and visual taste.

## Technology

By utilizing direct radiating technology, the C 35 center channel is a key component for the unique and immersive listening experience of the 360 Series.

The C 35 boasts a bevy of high-quality performance features including:

- Direct radiating technology for more focused, directional dialogue in larger room settings
- Dual aluminum-polypropylene hybrid dome woofers
- Aluminum dome neodymium tweeter

Despite its ultra-sleek design, the monopole, dual-woofer C 35 center channel is perfect for larger rooms. Its direct radiating technology allows for a more focused, directional dialogue.

**You won't believe it until you hear it.  
The 360 Series is Global Sonic Immersion.**

## Specifications

System	2-Way
Recommended Amp Power	Up to 125W per channel
Impedance	8 Ohm nominal
Sensitivity (dB @ 2.8V/1m)	86dB
Frequency Response	80Hz - 25kHz
Crossover	2.4KHz
Tweeter [mm / in]	25 / 1
Dimensions [in]	6" x 12.5" x 7"
Enclosure Material	ABS Plastic
Finishes	Black or White
