

Let us
entertain
you

Like all other Jamo Custom products, this in-ceiling speaker features a 2-position impedance switch and a 3-position tweeter level adjustment to match your musical preferences and system requirements.

The speaker's plastic 'bridge' make installation very easy as you can safely use this as a handle leaving your other hand free for holding a drill, screwdriver etc. The speaker is a one-piece item which means that you only needs to make one visit to the customer to mount it.

The grille covers the whole of the speaker which makes painting the product both simpler and quicker as you don't need to paint the speaker itself.
