

Let us
entertain
you

Choose the IC 610 LCR as your dynamic in-ceiling solution for the ultimate surround sound experience. It is a very discrete 3-way speaker – made to be heard, not seen. It can be positioned in a straight line in the ceiling as left, centre and right channels, in front of the flat screen or the projector screen. Mounted between the screen and your listening position, they will invigorate any movie experience: your place on the sofa is right in “the eye of the hurricane”.

The speaker's plastic 'bridge' make installation very easy as you can safely use this as a handle leaving your other hand free for holding a drill, screwdriver etc. The speaker is a one-piece item which means that you only needs to make one visit to the customer to mount it.

The grille covers the whole of the speaker which makes painting the product both simpler and quicker as you don't need to paint the speaker itself.

Specifications
