

S 8 ATM

DOLBY ATMOS™
ELEVATION SPEAKER

COMPLETELY NEW, COMPLETELY MODERN

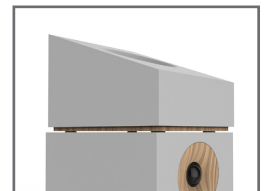

The new Jamo Studio 8 series has been completely reimagined to live seamlessly in modern, premium environments. Contemporary material and finish choices accentuate the clean, minimalist lines of this European design, while the compact cabinet designs are an ideal solution for urban living environments around the world.

TRUE DOLBY ATMOS® SOUND

Recreate the incredible cinematic experience of Dolby Atmos with the S 8 ATM Dolby Atmos Certified Elevation speaker, which reflects Dolby Atmos height effects off the ceiling down to the listener, to create a truly stunning, 3-dimensional surround sound experience.

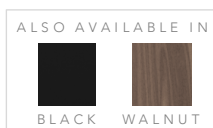

SEAMLESS DOLBY ATMOS® INTEGRATION

Elegant metal fasteners atop the S 809, S 807, and S 803 models provide a chic, modern industrial look, but also serve as a connection point for the S 8 ATM Dolby Atmos elevation speaker. This patent-pending design allows for all of the wire connections on the back of the floorstander, avoiding unsightly and messy speaker wire going all the way up to the Atmos module - for cinematic, completely immersive Dolby Atmos® sound while preserving the beautiful aesthetic of the Jamo Studio 8 Series.
