

Tivoli Audio® Music System® Three shown in White

Music System® Three Portable Hi-Fi System

The Music System Three produces portable audio like it has never been heard before. Tivoli Audio's PAL was the first portable radio to truly transport great mono sound outdoors and the Music System Three uses our proprietary analog Wide circuit to expand on this in high quality portable stereo. The innovation continues with the Lithium Ion battery pack that achieves a 75% charge in about 3 hours and offers enough playback time from a fully charged battery to outlast most parties. *Bluetooth* is included so you can stream your favorite music from your mobile device or computer in superb stereo sound.

The brushed metal multi-function control wheel gives instant access to power, volume, and snooze. The front panel offers further control such as source, auto station tuning, and easy-to-set alarms. The backside sports dual ports for enhanced bass, an external telescopic antenna, a stereo headphone output and auxiliary input, and an integrated carrying handle that doubles as a storage compartment for the included full-function remote control.

Dual independent alarms and a variable sleep timer are included, and the time will conveniently auto-set from FM RDS (where available). Additional features can be tailored to your specific taste including equalization and display backlight and contrast.

Whether you're at the beach, on a boat, on the porch, or at the next backyard barbecue, you can take great sounding stereo audio with you wherever you go with the Music System Three.

- Portable AM/FM/FM RDS/*Bluetooth* Music System
- Lithium Ion battery pack provides extended playback time with no memory or conditioning
- Built-in battery charger (external adapter included)
- *Bluetooth* Wireless Technology to stream your personal music
- Sensitive AM/FM RDS tuner with external FM antenna and internal ferrite rod
- Integrated carry handle houses full function remote control
