

TX-RZ840 9.2-Channel Network A/V Receiver

BLACK SILVER

A glance at the TX-RZ840's imposing front panel reveals a component built for one purpose: making your smile wider as the volume goes higher. Its thick chassis is loaded with custom parts tested and tuned to THX® Certified Select™ reference standards, handling massive current flows for sound you feel emotionally and physically. Beyond 3D surround supporting IMAX® Enhanced®1 content up to 11.2 channels, and a finessed touch that breathes life into stereo music, the receiver forms a hub for house-wide entertainment with Next-Generation Network Audio integrating AirPlay 2, Works with Sonos, Chromecast built-in'2, and more over 802.11ac Wi-Fi®*3. Three-zone powered D/A audio distribution is easily managed from your smartphone. With state-of-the art connectivity and custom-installation interfaces included, it's the TX-RZ840's visceral presence you'll find most difficult to resist.

n a future firmware update. *2 The unit may automatically download and apply an Over-the-Air software update during setup. *3 Some countries or regions

PRODUCT HIGHLIGHTS 215 W/Ch THX® Certified Select™ RZ Series

DAA system Ultra-wide 5 Hz–100 kHz frequency response Works with Sonos, Chromecast built-in*1,

front panel

IR input

- Custom-built High-Current Low-Noise Power Transformer
- Custom 15,000 μF high-current smoothing capacitors
- Non-phase-shift amp topology with discrete output stage

- VLSC™ (Vector Linear Shaping Circuitry) noise filtering (Front L/R)•
 PLL (Phase Locked Loop) anti-jitter technology for SPDIF audio
- Pure Audio Mode and Direct Mode for source authentic expression Independent tone controls (bass/treble) for all channels (Zone 3 excluded)

VIDEO & AUDIO SUPPORT

• Supports HDCP 2.2, 4K/60p, HDR (Dolby Vision™, HDR10, HLG), BT.2020, 4:4:4 color sub-sampling, 24-bit color, 3D Video, ARC

(Audio Return Channel), DeepColor**, x.v.Color, and LipSync via HDMI

Dolby Atmos, DTS:X, Dolby® TrueHD, and DTS-HD Master Audio®

- Dolby Atmos Height Virtualizer 3D audio processing Dolby Surround® and DTS® Neural:X upmixing technology
- IMAX Mode for IMAX Enhanced content
- THX® listening modes for movies, music, and games Sound optimization for games (Rock, Sports, Action, and RPG)
- Theater-Dimensional virtual surround-sound function

NETWORK FEATURES

- Next-Generation Network Audio supports multi-room streaming and Onkyo Controller*7
- Works with Sonos for the Sonos Home Sound System*8 Chromecast built-in and voice control¹⁹ with the Google Assistant
- AirPlay 2 multi-room audio and voice control vio with Siri DTS Play-Fi multi-room audio via Onkyo Music Control App¹⁷
- FlareConnect multi-zone audio with compatible components
- Quad-core SoC supports high-speed 802.11ac (2x2 MIMO) Wi-Fi Hi-Res Audio playback via network (DSD Direct 11.2 MHz***);
- DSD 11.2 MHz/5.6 MHz/2.8 MHz*11 [PCM conversion]; FLAC, WAV [RIFF], AIFF, and ALAC to 192 kHz/24-bit*12)

AMPLIFIER FEATURES CONNECTION FEATURES 215 W/Ch (6 Ω, I kHz, 10% THD, I channel driven),

HDMI inputs (I front), 2 outputs (Main [eARC], Sub/Zone 2) 180 W/Ch (6 Ω, 1 kHz, 1% THD, 1 channel driven, IEC) onent video input (assignable) Certified for IMAX Enhanced and THX Certified Select • 2 site video inputs (assignable)

Dynamic Audio Amplification with RZ Series Build digital audio inputs (optical and coaxial, assignable) Ultra-wide 5 Hz-100 kHz frequency response • 6 analog RCA

· I phono input with built-in low-noise MM equalizer for turntable • 3.5 mm setup mic input for AccuEQ Advance (front)

- 6.35 mm headphone jack (front)

- s that affect wireless signal strength and the use of Wi-Fi channels. Extruded anti-resonant aluminum heat-sink with black anodized paint
- II.2-channel pre-outs (analog RCA, variable) Strengthened power-supply line for high-current dynamics 2/Zone B and Zone 3 analog RCA line-level outputs
- Refined HDMI grounds and short signal-paths reduce noise screw-type speaker posts (including Zone 2)
- Isolated SoC board reduces interference Bi-directional Ethernet terminal for network and IP control
- High current capability for 4-ohm speaker drive input (5 V/I A) for audio playback (rear) • USB
- 232C serial port for remote control
- IR (infrared) input for remote-control extenders • 12 V trigger output (Main, assignable, 100 mA)
- AC socket for detachable IEC power cord

ADVANCED FEATURES

- AccuEQ Advance 9-point calibration with AccuReflex · Bluetooth® wireless technology with Wake on Play Standby
- Advanced Music Optimizer improves compressed audio playback
- Vocal Enhancer DSP clarifies dialog via remote or front-panel controls
 HDMI Main Out features eARC transmission of HQ audio from
- supported TVs to the A/V receiver · Aluminum front panel and door to conceal front-panel controls
- Zone 2 and Zone 3 speaker outputs with Zone 2 and Zone 3 DACs play synced or unique D/A sources simultaneously
- (Zone 2 supports HDMI/SPDIF*13) Zone 2 line-out mode connects audio systems for independent D/A playback (including HDMI/SPDIF*14) in two rooms
- · Zone B line-out mode supports wireless headphone transmitter connection for simultaneous playback of D/A audio in Main and Zone
- Zone 2 and Zone 3 line-outs support simultaneous output
- Front-to-Height speaker-switching in Stereo Assign Mode for BGM 1080p to 4K Super Resolution upscaling via HDMI
- GUI with overlaid OSD via HDMI featuring media input/output display
- · Crossover adjustment for each channel . (40/50/60/70/80/90/100/120/150/180/200 Hz)
- A/V Sync Control (up to 500 ms in 5 ms steps at 48 kHz)
 Various efficient standby modes and HDMI pass-through
- Optional rack-mounting kit (IRK-180-4C)
- IP control for home automation, SmartGrid-ready
- 3-Mode display dimmer (Normal/Dim/Dimmer)
- 40 FM/AM random presets
- · Redesigned simple remote control

*I The unit may automatically download and apply on Over-the-Air software update during setup. *2 FlareConnect is a proprietary network protocol that shares select audio sources between supported components. Please visit the Onlyo website for product compatibility information. *3 Service ovailability varies with region and subscriptions may be required. *4 Enabled with a future firmware update. *3 HDMI Zone 2 Out mode supports signols from HDMI inputs I –3 only. *6 Some countries or regions have regulations that affect writeress signal strength and the use of Write Fichannels. *7 Available free at the App Store and Google Pay for Phone, iPad, and Android* edvects. Please check device and OS requirements before installation. *8 Requires a Sonos Connect (sold separately). *9 Voice control requires as most speaker featuring the Google Assistant. *10 Voice control with Siri requires an Apple HamePad. *11 I DS playbock over WF-Fi cannot be quaranteed in all network environment. *12 Supported sampling rates may depending on network environment. *AIAC supported to 96 kHz. *13 When set to Zone 2, HDMI audio is available on inputs I –3. SPDF and HDMI support PCM signals only unport PCM signals on ous playback of multiple audio sources enabled. Zone 3 supports analog/NET/Bluetooth. *14 HDMI audio is available on inputs 1–3. SPDIF and HDMI support PCM y. Simultaneous playback of multiple audio sources enabled. *15 When set to Zone B, playback of encoded and PCM audio via any input is enabled in Main and Zone

using the Onkyo Controller app. The TX-RZ840 has (6 Ω, I kHz, 10%

THD, I-ch driven) extra DACs to distribute unique or synced D/A audio sources 180 W/Ch via Zone 2 and Zone 3 speaker

outputs, including HDMI®/ (6 Ω, I kHz, I% THD, I-ch driven, IEC)

TX-RZ840 9.2-Channel Network A/V Receiver

This Onkyo A/V receiver is released under the IMAX Enhanced* program, which features DTS:X immersive audio decoding that is optimized to properly reproduce the full dynamic range of IMAX theatrical sound mixes available in digitally remastered IMAX Enhanced content. The IMAX Mode reproduces IMAX Enhanced content at the highest levels, just as the filmmakers intended. IMAX Enhanced versions of films, from Hollywood blockbuster movies to documentary films, are scheduled for 4K HDR streaming and Ultra HD Blu-ray™ release.

THX® Certified Select™ cinema-reference sound

guarantees the same reference volume level of a commercial viewing position is about 3.5 m from the screen. To gain sound within strict THX $^{\otimes}$ sound-quality parameters, bench-tests in 75 categories covering 14,000 data points.

Quad-core SoC supports 802.11ac Wi-Fi®

2003 5 mV rms/47 kO (Phono MM) mV rms/47 kΩ (Line) A powerful SoC (System on a Chip) processes multiple tasks at once. It evolves network functions and supports the latest highspeed 802.1 lac (2x2 MIMO) specification while compatible with 802.11 b/g/n dual-band

routers. Note: Some countries or regions have regulations that affect wireless signal strength and the use of Wi-Fi channels.

Clarify voice dialog in-program instantly

Vocal Enhancer solves inaudible dialog in TV programs and movies. DSP technology identifies voice frequencies so you can conveniently adjust them using remote-control keys or controls on the front panel.

Versatile Zone 2/Zone B line-out

Connect your supported hi-fi system via analog RCA input to the AVR's Zone 2/Zone B line-out. In Zone 2 mode, you can play the same or different analog/digital sources (including SPDIF and HDMI) in either or both rooms at the same time. Zone B mode is an ideal match for a supported wireless transmitter. Listen to any source through wireless headphones No-sound power consumption

for disruption-free late-night TV entertainment.

AccuEQ Advance with AccuReflex

AccuEQ Advance room acoustic calibration uses ninepoint mic measurement to calibrate and EQ speakers and subwoofers and remove standing waves that arise when sound from the speakers resonates with sound reflecting off the walls, compromising its proper expression. During the process, background noise is ignored to ensure accurate equalization. AccuReflex optimizes 3D sound through height speakers by resolving phase-shift, resulting in a cohesive sound-field.

Dolby Atmos® and DTS:X®

Dolby Atmos and DTS:X formats map sounds in 3D space, allowing them to move around the room and immersing your audience in the film. With 11.2-ch pre-outs and 11-ch processing, you can enjoy 3D sound through a 7.2.4 layout (external power amp required), or use built-in amps for a 5.2.4 or 7.2.2 layout. Enjoy classic titles through your height-enabled speaker system with Dolby Surround® and DTS® Neural:X finding cues in legacy soundtracks and upmixing for spatial

Dolby Atmos Height Virtualizer

When playing any Dolby® format, engaging Dolby Atmos Height Virtualizer* enables a more immersive listening experience, creating a virtual surround and height effect from traditional speaker layouts without employing additional speakers.

Dynamic Audio Amplification - RZ Series Build

DAA stabilizes power delivery for accurate control and spectacular dynamics. High-Current Low-Noise Power Transformer and custom 15,000 μ F high-current smoothing capacitors deliver instant power while non-phase-shift amps capture a 5 Hz– 100 kHz frequency response. To keep them cool, an extruded aluminum heat-sink with black anodized paint controls resonance frequencies while more effectively cutting thermal distortion. Behind the aluminum front panel are hand-selected audio parts. DAA produces a visceral musicality that makes every note an emotionally moving experience.

New upgrades reduce noise and boost power

 $Additional\ refinements\ control\ noise,\ boost\ power,\ and\ improve\ S/N\ performance.\ A\ new\ HDMI^{\circledast}\ board\ has\ shorter\ signal-new\ performance.$ paths and large, well-finished grounds for A/V signal integrity. SoC is isolated to reduce interference noise. The power-supply line is reinforced in pursuit of smooth power delivery. These contribute to punchier bass and improved localization on an expanded sound-stage.
