

PAL® + Bluetooth™ shown in High Gloss Black, Blue, White, and Red.

PAL® + Bluetooth™

Portable Audio Laboratory® with DAB

Take Tivoli Audio's wildly popular PAL radio, and future proof it with a sensitive DAB/DAB+/FM RDS digital tuner and add *Bluetooth* wireless technology, and what do you have? Simply stated, one of the best compact portable audio devices available.

The PAL+ *Bluetooth* is small enough to tote about, yet plays loud and provides a surprisingly big sound from its 2.5" coated driver. The addition of *Bluetooth* wireless technology allows effortless streaming of your favorite tunes from your enabled mobile device, tablet, or computer. But fear not, an auxiliary input is also provided for more "old fashioned" wired devices, along with a stereo headphone output. The rechargeable NiMH battery will last for many hours on end, and the integrated charger conveniently charges the battery whenever the included external adapter is connected. And because it's weather resistant there is no reason to not take the PAL+ *Bluetooth* along.

A multi-function control wheel on top gives instant access to power, volume, source, and tuning, while the front sports 5 favorite station presets for each band. Use the full-function remote control to customize and adjust equalization, backlight, and alarm functions. The time will even auto set via DAB or FM RDS.

More than just a portable *Bluetooth* speaker. More than just a DAB radio. It's Tivoli Audio's PAL+ with *Bluetooth*!

- Portable DAB/DAB+/DMB/FM/FM RDS
- Environmentally friendly NiMH battery pack provides many hours of playback on a single charge
