

KEY POINTS

- 8" cellulose pulp woofer driver
-  Danish design

DESCRIPTION

With its sober design and targeted performance, the XSW8 is the ideal complement to your Spectrum II system.

Its 8" cellulose driver, working as a closed enclosure, reproduces frequencies from 25 to 200 Hz with remarkable accuracy for its size.

The 100 W RMS power output, combined with an adjustable crossover frequency of up to 150 Hz, means you can fine-tune your installation.

Phase selection (0°/180°) and stereo RCA inputs simplify integration, while auto-sleep and smart-start functions make it a discreet everyday companion.
