

Some of the best places to listen to music are beyond the walls of our homes. That's why the TDG Audio Marine Series lets you take your favorite music to the great outdoors. Whether it's a boat deck or a patio deck the marine speakers stand up to the harshest environments and perform with outstanding accuracy. These are no ordinary outdoor speakers. We took two of our finest in-ceiling speakers and loaded them with technology to resist the elements. The IP-66 certified design meets strict independent standards for resistance to water. The unique magnetic stainless-steel grill will never rust. The TDG Audio Marine Series means you no longer have to make compromises when listening to audio outside.

Our team is genuinely excited about music and still gets a thrill when we listen to our favorite music perfected on one of our newest creations. Of course each of our speakers is backed by our **LIFETIME WARRANTY**.
