Marine Rated Flangeless In-Ceiling Speaker

TDG's engineering experience has been leveraged to create the ideal speaker for use in marine and outdoor environments. Every detail has been addressed. Materials chosen are all impervious or extremely resistant to corrosion. Steel components are either stainless or zinc plated before powder coating. Adhesives are all robotically applied to be consistent and uniform and the crossover network that holds the electrical components is completely epoxy resin coated. Topping it all off is a gold plating to assure electrical connections to speaker wiring is ideal.

Most importantly there is no compromise in performance allowing you to enjoy incredible music in incredible settings.

KEY FEATURES

- Conforms to Military Standard 810G for humidity, salt spray, temperature and UV
- IP-66 rating for protection against heavy seas and powerful jets of water
- Smooth Visual Flangeless System
- Poly Resin CrossPoint Molds for increased rigidity
- PRX Doglegs
- Low Iron Stainless Steel Never Rust Grills firmly attached with Neodymium Magnets
- XTS Moisture Seal Treated Crossover
- Extra Wide Threaded Screws for Quick Dog Leg Fastening
- Large Push Gold-Plated Binding Posts
- **LIFETIME WARRANTY**

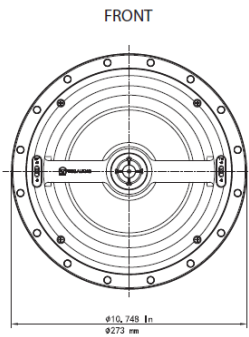

NFC-82

ACOUSTIC SPECIFICATIONS

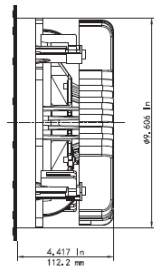

- 8" Aluminum Trueform Woofer
- 1" Aluminum HDAlloy Pivoting Tweeter
- 5/150 WPC Power Handling
- Frequency Response 39Hz - 20kHz
- 88db SPL

MECHANICAL SPECIFICATIONS

- Total Diameter with Grill: 11 1/4" (285mm)
- Mounting Depth: 4 3/8" (248mm)
- Cut-Out Dimensions: 9 3/4" (248mm)
- Pre-Construction: Use Vanguard PCBC-8 or MSE-8
